DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 12/18/2003 has been entered.

Election/Restrictions

2. This application contains claims directed to the following patentably distinct species of the claimed invention:

A: claims 2, 4, 8-10 and 13 drawn to an orientation division type liquid crystal display according to Figs. 2A and 2B. The specifics of the display module being a black matrix layer below the underlying layer at a thickness equal to a thickness with which the black matrix layer protrudes from a surface of the color filter corresponding to the pixel electrode.

B: claim 3 drawn to an orientation division type liquid crystal display according to Figs. 3A and 3B. The specifics of the display module being adjacent ones of the color filters are overlapped such that the overlapped edge portions have a thickness equal to a thickness with which the overlapped edge portion protrudes from a surface of the color filters.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, none of the claims is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

4. During a telephone conversation with Mr. Anthony N. Fresco on 02/26/2004 a provisional election was made without traverse to prosecute the invention of Species I, claims 2, 4, 8-10 and 13. Affirmation of this election must be made by applicant in replying to this Office action. Claim 3 is withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

EXAMINER'S AMENDMENT

5. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Anthony N. Fresco on 02/26/2004.

The application has been amended as follows:

In the claims

- Cancel claim 3.

Allowable Subject Matter

6. Claims 2, 4, 8-10 and 13 are allowed.
7. The following is an examiner's statement of reasons for allowance:

A search of the prior art did not disclose an orientation division type liquid crystal display comprising a combination of the structural elements, more specifically:

(a) An underlying layer of the pixel electrodes extends such that an apex portion of the protrusions protrude from the surface of the pixel electrodes toward the side of the common electrode and a black matrix layer below the underlying layer at a thickness equal to a thickness with which the black matrix layer protrudes from a surface of the color filter corresponding to the pixel electrode.

In the previously cited prior art by Kishimoto, the black matrix (13) is directly on the substrate (11) and thus is not below an underlying layer and no extension of the underlying layer towards the common electrode is disclosed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
